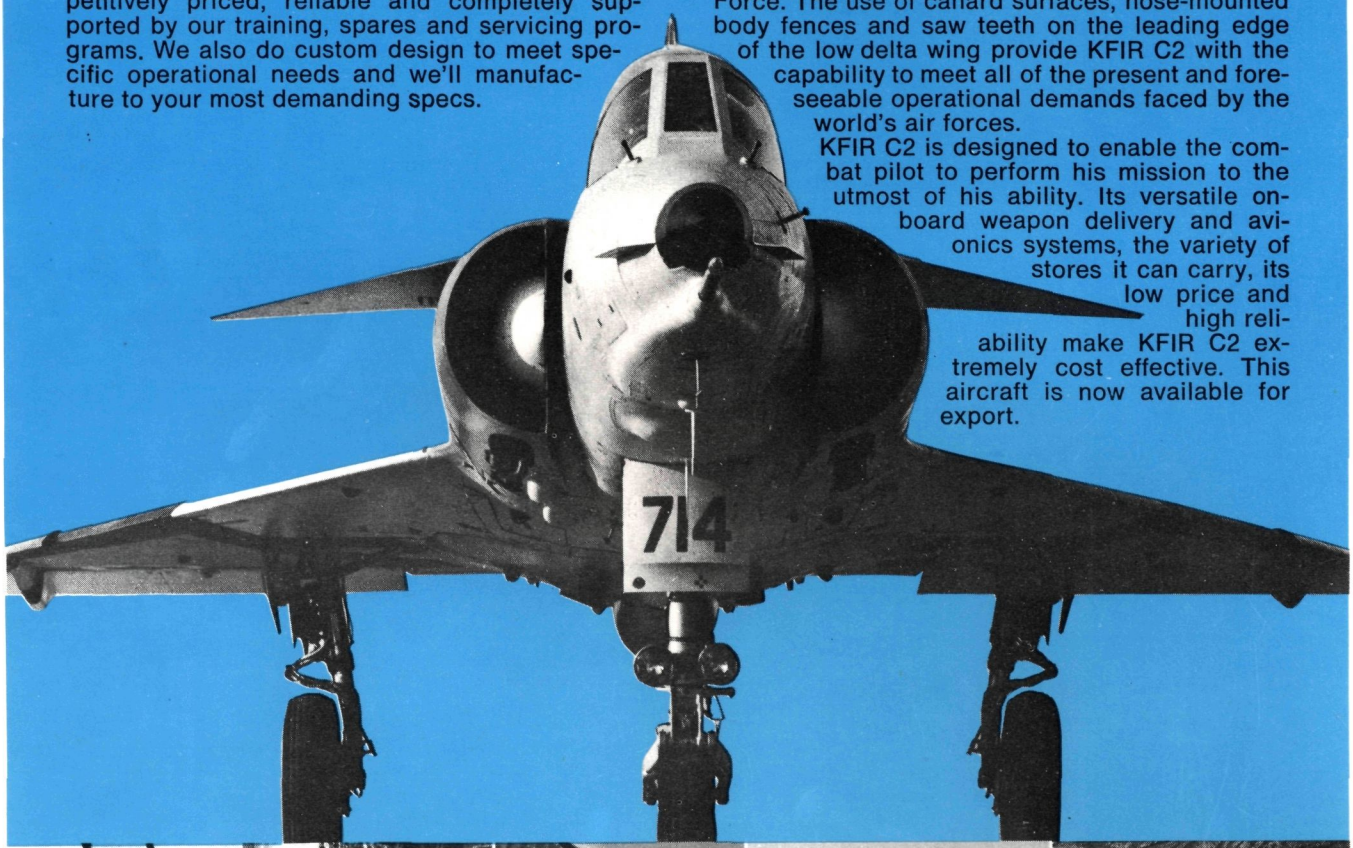
Israel Aircraft Industries offers Superiority.

We offer a wide range of off-the-shelf systems and products which are in service with a growing number of defense forces around the world. The result of advanced technology, they're competitively priced, reliable and completely supported by our training, spares and servicing programs. We also do custom design to meet specific operational needs and we'll manufacture to your most demanding specs.

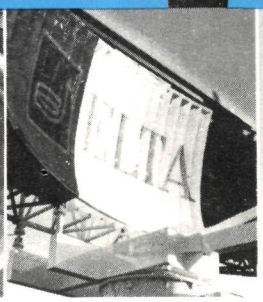
KFIR C2 The Mach 2.3 plus, single-seat, multi-role fighter-interceptor and ground attack weapons platform developed by IAI to meet the needs of the Israel Air Force. The use of canard surfaces, nose-mounted body fences and saw teeth on the leading edge of the low delta wing provide KFIR C2 with the capability to meet all of the present and foreseeable operational demands faced by the world's air forces.

KFIR C2 is designed to enable the combat pilot to perform his mission to the utmost of his ability. Its versatile on-board weapon delivery and avionics systems, the variety of stores it can carry, its low price and high reliability make KFIR C2 extremely cost effective. This aircraft is now available for export.



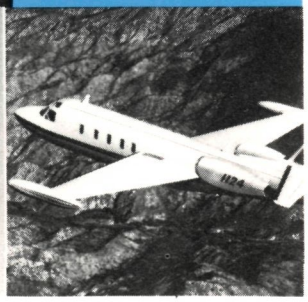
MABRA. Audible bomb release altimeter. Small, easy to install Mabra increases bombing accuracy, decreases pilot work load.

ONE-STOP and off-shore total service from our famed Bedek* Aviation facility. Engines. Airframes. Avionics



ATC RADAR. Transportable, solid state, designed to operate from forward bases.

ARAVA multi-mission STOL pax/troop/cargo transport. Rugged, easy to operate and maintain.



1124/1124N WESTWIND. New 2,900 mile range. 7 to 10 place. VIP/surveillance turbofan transport with Mach .765 speed.

IAI The Mark of Reliability.
